

Inventory Analysis

March 11, 2009

Top loss areas – (Dept, SKU, etc.)

- **How many days does your system maintain?**
- **Can you run reports in your EBR application to show why the top losses occurred?**
 - **Which reports are you running?**
 - **What is the target of your reports?**
 - **Are you using the reports and/or their results to create new rule sets or queries?**

The ever elusive “Predictive Model”

- **Which data can you pull to see the correlation to shortage?**
 - **Assessments**
 - Acceptable versus Unacceptable ratings
 - Average Scores
 - **Previous shortage history**
 - **Reported known shortages**
 - **Professional hits**
 - **Internal cases**
 - **CAP Index**
 - **Management tenure**
 - **Turnover**
 - **Payroll hours used**
 - **Conversion**
 - **Etc.**

“Predictive Model” (cont.)

- **Once you have the data, does it even have a correlation to shortage?**
- **How can you get all the data in one place to analyze potential future shortage?**
- **How often can you get this information fed to update your model?**
- **How does this tie into your EBR system?**

Other comparisons

- **What other comparisons are you being asked to review?**
 - **Marked Out of Stock**
 - **Changes in policy**
 - **Review of assets**
 - EAS
 - Guards
 - Cameras
 - Burglar Alarms
 - **Off site stock room stores**
 - **Implementation of different systems**
